

Back Office Integration

Don't Just Collect Data – Integrate It With Your Systems

doForms Back-office Integration enables you to quickly and seamlessly synchronize and integrate data collected in the field with your existing back-office accounting, CRM systems and databases.

No more manual data entry, struggling to read illegible handwriting or waiting for paperwork from the field. doForms makes integration easy and requires no programming. Simply pick a prebuilt connector and with some minor configuration you're ready to go.

What you get is instant access to reliable data for analysis, documentation and record keeping.

Sync & Save

Eliminate manual data input and see your data in near real-time. Data can be output to your CRM, accounting package, financial systems and databases.

doForms for Salesforce.com

Keep your customer files up-to-date and available in the business world's go-to CRM. Data flows directly into Salesforce.com, no double entry.

doForms for QuickBooks

Go directly from forms right into QuickBooks for accurate and up-to-date financial data, no manual input required.

Excel Plug-in

Simply add doForms right into your Excel toolbar, point to your form and in seconds your data is in your spreadsheet. The sync button automatically keeps your spreadsheet current.

doForms Back-office Integration Benefits

- No programming required
- Affordable – no expensive third party gateways
- Save thousands by simplifying clerical tasks
- Extends the functionality of most backend systems
- Can be setup quickly
- Requires no special hardware or skilled labor

Custom Integration Services

While doForms strives to offer you a total solution right out of the box, we're ready, willing and able to go the extra mile and offer the services you may need to match your specific requirements. Talk to us about custom interfaces, mobile tools and software solutions. It may cost less than you think. Contact us for a quote.
